Noorann Modern Education

We offer an *easy, fast, and fun* way to learn the Arabic language. Interesting lessons with multimedia, interactive games and the state-of-art linguistic technologies which supersedes the traditional ways of learning. Students will learn letters, pronunciation, vocabulary, reading, writing, grammar, and conversation. *Students* can learn using their own native language with hundreds of learning hours and thousands of practice questions. *Parents* can monitor their student progress from home and help in the education process. *Teachers* can setup classrooms and use our lessons and technologies for better and easier teaching methodology. *School administrators* can get reports for each student and classroom progress and the keep reports permanently on remote computers for many years. We have a *complet Arabic Language Curriculum support* with more languages to come. Let's talk about using this in your school.

OBJECTIVE

We offer an easy, fast, and fun Modern Education system to teach the Arabic language at schools and at homes. We use advanced linguistic technology to provide the latest modern education methodology for early and advanced learners to enhance and deepen the understanding and commanding of the language.

SUMMARY

We invite schools in the United States of America to adopt this advanced Arabic program as we strive to make it the standard curriculum in the country.

Dear teacher and school administrator,

We are *Noorann Modern Education*, a company specialized in the Arabic Language Education using a proven effective methodology utilizing the linguistic technologies and internet solutions. We created an online curriculum that is suitable for beginner and advanced students. We have been running USA schools with a great success for native and non-native Arabic language speakers. We use fully interactive media interfaces which makes the Arabic language learning easier, fun, and more effective. In addition, we provide books, visual aids, worksheets, and flashcards.

Over the last five years, our company has been developing an advanced modern education solution to bring the teaching of the Arabic language to the same quality level of other subjects in the public and private schools in the United States of America. We have tested the solution with children of different ages and we noticed an improvement in the learning quality over the traditional methodology currently used to teach the Arabic language.

We are contacting your respected institution to inform you about this solution and engage with you in a conversation about using it as a primary or parallel education tool for your students and show the benefits for the students, parents, and your institution. We will be glad to reply to your emails, answer your calls, or arrange for a meeting to provide more information and answer all questions to clarify our solution benefits.

Currently, we are focusing on the early learners up to the fifth grade. We cover the Arabic letters, pronunciation, vocabulary, reading, writing, conversation, and grammar. We are working hard to expand our coverage to higher grades soon. Teachers and schools can setup classrooms and design curriculums for the targeted levels using our Arabic lessons.

- ***You can adopt our curriculum to improve your Arabic education quality, make more profit, spend less efforts, become more effective.***
- ***You can use the website lessons as an extra-curriculum activity inside or outside the classroom as an education enrichment tool.***
- ***You can recommend the website for parents to use at home if they like to improve their children Arabic language skills. We offer remote mentoring through phone calls and online conferences as well.***

Please contact us to discuss using this educational solution for this or next school year!

Sincerely,
Mohamed Elgazzar

Advantages of using Noorann Modern Education Solution

- **Hearing the correct pronunciation** of the lesson words, sentences, questions, and answers from the computer at school and at home many times until they master the pronunciation and memorization.
- **Gamification of the curriculum** makes it more exciting for students to spend more time learning using our advanced technique which is not available in the traditional teaching methodologies.
- **Hundreds of interactive practice questions** with varying difficulty levels to engage the student in drilling activities. This advantage is not to be found in the regular workbooks available in the market.
- **Self-guidance** on the website (lesson plan, activity tracking, tasks, reports, notification and emails) to advance their learning on their own which help advance their language skills and reduce work inside the class.
- **Complete translation** of the teaching instruction and lesson explanation are available in multiple language which makes easier for non-native speakers to learn the Arabic language using their own mother tongue.
- **Multi-media visual and audio aids and game like learn and practice activities** (pictures, audio, and video) makes the learning more interesting and engaging for younger students.
- **Full curriculum with lesson plan** ready for each day and week and shared among students, teachers, parents, and school administration. Lessons are rich in content and language artistic elaboration.
- **Automatically generated reports, statistics, and alerts for each individual student** are available for students, parents, teachers, and school administrators to better understand student's performance.
- **Digital classroom (integrated and synchronized with the school classroom)** makes it easy for teachers to create student documentation, reports, and communication with students and parents.
- **Student and classroom performance reports and comparisons** makes it easier on the school administrative to manage the educational process and keep shared digital records for years with all stakeholders.
- **Printed learning cards, learning books, practice books, coloring books, worksheets, flashcards, and educational games** that are based on the digital curriculum are available for hand writing and other activities.
- **Many more advantages that we can demo for you soon.**
- **Discounted subscription price** for school students which we can be collected from parents online or school can collect and take %20 of the subscription price for the efforts. Receive referral bonus for individual students.
